Coming Fri. - Sat., June 15th, 16th
JACK OAKIE - GINGER ROGERS
JACK HALEY in

"Sitting Pretty"

William Weber, nineteen-year-old
son of a pioneer farmer near Drum-
heller succumbed to fumes from
grasshopper poison.

BLAIRMORE UPSETS JINKS

In the biggest upset in the present
soccer season the Blaimore Football
Club, cellar occupants of the Crows'
Nest Pass Football League, humbled
the league-leading Coal Creek XI by
a 3 to 2 score on the Blaimore stadium
ground on the Blaimore last Satur-
day evening.

The Blaimore club presented a re-
arranged lineup and the club appear-
ed to be stronger for the change.
Kemp was taken off the forward line
and put on the full back line where
he did excellent work, with Oliver.
Morris was used as half-back and Bill
Johnston put in the game as centre
forward, and in this position turned
in the hat trick for Blaimore, boot-
ing in the three counters for the home
eleven.

BLAIRMORE PUBLIC LIBRARY

Books being placed on the shelves
this week are:

"Deep Lake Mystery," Carolyn
Wells; "The Big Fella," Ruby M.
Ayres; "Haunting Fingers," Herman
Landon; "The Vicar's Daughter," E.
H. Young; "The Little Shepherd of
Kingdom Come," John Fox, Jr.; "Just
David," Eleanor H. Porter; "Woman
in Flight," Fritz Re. Malle-Zewen;
"The Great Prince Shan," E. Phillips
Oppenheim; "Two Little Savages,"
Ernest Thompson Seton.

The library hours are Tuesdays,
Thursdays and Saturdays from 7 to
9 p.m. The fees are \$1.00 for residents
and \$2.00 for non-residents per year.

The Castle River Club will hold
their annual sports on July the 18th.
Horse racing, rodeo, etc.

BIG DAY PROMISED

FOR BLAIRMORE JULY 2nd

A splendid spirit of co-operation
was displayed at a meeting of the
Blaimore Amateur Athletic Association
held at the Greenhill hotel on
Tuesday night, at which representa-
tives of the Miners' Union and the un-
employed were present.

It was decided to co-operate with
these organizations in every way pos-
sible.

The programme and finance com-
mittees reported progress, the former
having practically completed their
work, while the latter still hoped to
add \$200 or more to the fund of \$115
already subscribed.

His Worship Mayor Knight, on be-
half of the local union, stated that an
effort was being made to have a spe-
cial train run to Blaimore from Na-
tal, or perhaps Fernie, on that day,
and that in such event an additional
1200 or more people would likely be
brought to town from the west.

The programme of sports and field
events, to be carried out under the
official sanction of the A.A.U. of C., will
be practically the same as last year's,
including the Pinkney Jubilee Cup
marathon, baseball, softball, foot-
ball, etc., with attractive prizes.

Both concessions were granted the
unemployed and the Ladies' Aid.

At night, a grand dance will be
staged in the Columbus hall, with the
Band-His orchestra in attendance.

We understand that an added at-
traction for the day will be a double-
header boxing title go, to be staged
in the Columbus hall between 7.30
and 9.30 p.m. This feature is spon-
sored by Mr. Frank Barringham, of
Coleman, and, being of a professional
nature, has no connection whatever
with amateur events of the day. Tick-
ets for the boxing affair will be on
sale in a few days by the unemployed.

IMPORTANT ACT AMENDMENT

The Enterprise is in receipt from
Edmonton of the text of an amend-
ment of the Vehicles and Highway
Traffic act passed at the last ses-
sion of the Alberta legislature. This
amendment, which deals with the
matter of advertising by persons
who do not hold a public vehicle
or liveryman's license, follows:

"58. (1) No person shall in re-
spect of any motor vehicle other
than a motor vehicle duly licensed
under the Public Vehicles Act, 1927,
sell or offer to sell tickets for the
transportation of passengers or prop-
erty by means of a motor vehicle in
any case where that transportation
involves the travel by motor vehicle
over any highway or part of a high-
way outside the corporate limits of
any city, town or village.

"(2) No person shall in respect of
any motor vehicle other than a public
vehicle duly licensed under the Pub-
lic Vehicles Act, 1927, or a motor ve-
hicle licensed for the purposes of the
business of a liveryman, by advertis-
ing or otherwise solicit the transpor-
tation of passengers or property by
means of a motor vehicle in any case
where that transportation involves
the travel by motor vehicle over any
highway or part of a highway out-
side the corporate limits of any city,
town or village.

"(3) No person, not being the own-
er or operator of a public vehicle or
the authorized agent of such owner or
operator, shall operate a travel bureau
or place for soliciting or advertising,
or for the sale of tickets for the
transportation of persons on high-
ways outside of a city, town or vil-
lage by motor vehicle.

"(4) Any person violating any of
the provisions of this section shall
be guilty of an offence and shall on
summary conviction therefor be liable
to a penalty of not less than fifty dol-
lars nor more than two hundred dol-
lars, together with costs, and in de-
fault of payment to imprisonment for
a term of not more than ninety days."

DOYLE-WHITE NUPTIALS

On Thursday afternoon, May the
10th, Freda, only daughter of Mr. T.
C. C. Buchanan-White, and Mr. Wil-
liam Doyle, nephew of Mrs. Frances
Doyle, of Gauden road, Lulu Island,
were united in marriage by Rev. P. B.
Fogarty, assisted by Rev. Father
Kenny. The ceremony took place in
St. Anthony's church, Marpole. The
bride, given in marriage by her
father, was lovely in a gown of lus-
trous ivory satin cut on semi-fitting
lines with graceful train. The hand-
made veil was caught in place with
orange blossoms and she wore the
bride's gift, a necklace of cut crys-
tals. Gold brocade shoes and silk net
gloves completed the costume. Miss
Marguerite Haverly and Miss Peggy
Doyle were the bridesmaids, the
former wearing eggshell taffeta over
bride satin, and the latter clad in
spring green taffeta. Picture hats
were worn by both. Helen and
Frances McVicar were flower girls,
frooked in Kate Greenaway dresses
and bonnets, their frocks matching
those worn by the bridesmaids. Mr.
Lawrence Doyle attended the groom,
and Mr. Alexander McEwen, of Gib-
son Landing, Mr. Glen Jones, of Van-
ouver and Mr. J. J. Foran were
ushers. During the signing of the
register, Mr. William Buckley sang
"Because."

The reception at the home of Mrs.
Frances Doyle was attended by over
one hundred guests. Mrs. Stutchberry
and Miss Gladys Stutchberry had de-
corated the rooms, pink and white
tones being employed, with tiny cu-
pids dangling from the streamers. A
pretty arch of pink and white, with a
wedding bell suspended, formed a set-
ting, under which the bride and groom
received their friends. A feast to the
taste of the occasion was proposed by
Rev. Father Kenny. The bride's table
was centred with a three-tier wedding
cake, a miniature bride and groom
adding a pretty touch to the decorated
table. Mr. and Mrs. Doyle left for
Victoria for a short honeymoon, the
latter wearing a smart grey ensemble
with matching hat and accessories.
Upon their return, the young couple
will take up residence on Gauden
road—Vancouver Ex.

The Doyles and Buchanan-White
were former residents of the Cowley
district.

WEDDINGS AT PINCHER CREEK

On Sunday, June 3rd, in the Pin-
cher Creek United church, the marriage
of Allie Matson and Sophia Mieran-
ovics, both of Bellevue, was quietly
solemnized in the presence of a few
friends by Rev. N. W. Whitmore, B.A.

On Thursday, May 31st, in the
same church, and by the same offi-
ciating clergyman, Jenny Evelyn
Borthwick, younger daughter of Mr.
S. Borthwick, of Pincher Creek, was
united in marriage to Ralph Ellison,
of Bellevue.

Heavy and almost continuous rains
of the past several days have caused
local streams to rise to almost flood
level. So far, no damage has resulted,
but with continuation of the precipi-
tation, some creeks may overflow their
banks.

Since the new newspaper govern-
ment was announced in our last is-
sue, we learn that the attorney-gen-
eral, Ben A. Huckell, has resigned.
This resignation was due to the fact
that no newspaper government would
be complete without Mr. Herb McCrea
as a member of its cabinet, and the
premier, Mr. A. L. Horton, recogniz-
ing the force of Mr. Huckell's argu-
ments, accepted his resignation and
appointed Mr. Herb McCrea to the
position. The Inifinal Province feels
that it was only Herb's innate mod-
esty that excluded him from the slate
in the first instance.

C.N.P. INTERSCHOOLISTIC TRACK AND FIELD MEET

M. D. McEachern, of Bellevue, sec-
retary of the Crows' Nest Pass Inter-
schoolistic Track and Field Meet,
which was held in Blaimore on Mon-
day, May 28th, gave out the official
results of the meet last Tuesday
evening.

Bellevue Public School won the
championship of the meet with 192½
points and thereby won the Crows'
Nest Pass Coal Operators' shield, em-
blematic of the interschoolistic cham-
pionship. Hillcrest school came second
with 137½ points, just nosing out
Coleman school in third place with 137
points. Blaimore scholars placed
fourth with 66 points, followed by
Pincher Creek in fifth place with 63
points. Cowley school with 11 points
wound up in sixth place and Frank
school with 8 points to their credit
took last position in the scoring.

Two provincial records were broken
during the meet. Eddie Semans, of
Hillcrest, competing in Class C, boys
under 16 years of age, broke the 8-
pound shot put record when he tossed
the ball a distance of 35 feet 9 inches.
The former record was 34 feet. Rose
Corney, of Frank, competing in Class
D, under 18 years of age, broke the
girls' record in throwing the baseball
161 feet 3 inches, breaking the old
record of 141 feet 9½ inches by more
than 20 feet.

Bronze medals awarded to competi-
tors gaining the greatest number of
marks were won by, R. Destobell, of
Coleman, with 15 points; Silvo Fav-
ero, of Bellevue, with 13 points;

BLAIRMORE UNITED CHURCH
Rev. Albert E. Larke, Minister

"Serve the Church that the Church
May Serve You."

Services Sunday, June 10th, the
minister in charge.
11 a.m.—SENIOR SCHOOL.
2 p.m.—JUNIOR SCHOOL.
7.30 p.m.—PUBLIC WORSHIP.

ST. LUKE'S CHURCH NOTES

Rev. A. S. Partington, B.A., Rector

Services Sunday, June 10th:
Sunday School at 10 a.m. in the
church.
Morning service at 11 o'clock.

Thomas Scott and Lionel Fournier,
both of Pincher Creek, with 20 points
each; Olga Terelick, of Hillcrest, with
15 points; Mary Snider, of Coleman,
with 29 points, and Bawn McInnis, of
Bellevue, with 22 points.

Silver medals awarded for the high-
est aggregate points were won by
Sam Richards, of Hillcrest, with 26
points; Dorothy and Frances Cos-
sick, of Bellevue, with 23 points
apiece.

The meet was a decided success and
keen close competition was the order
of the day.

WORLD HAPPENINGS BRIEFLY TOLD

The Straits Settlement legislative council adopted a bill restricting rubber production in conformity with the London agreement.

France and Great Britain plan to consider jointly the problem of debts owed to the United States at a meeting of envoys in Geneva.

Forty aborigines and whites have perished in Western Australia, victims of a mysterious disease, the Daily Herald's Australian correspondent has cabled.

Hints are heard that a new move would be to get Germany back into the tottering world disarmament conference. The move was said to revolve around the United States.

The body of Sam Behan, Portsmouth penitentiary convict who died suddenly of a heart condition, has been claimed by his widow and has been sent to Brooklyn, N.Y.

Half a million pickled fry were deposited recently in the Moose Jaw river at the Wild Animal park by officials of the department of natural resources.

Definite adoption of a pacifist attitude and commitment of the organization of public opinion in the interests of peace was made at Toronto at the conference of the Association of Canada Clubs.

Birth of five daughters to Mrs. Olive Dionne near Callander, Ont., in the first quintuple birth in Canada. So far as he knows, Dr. F. C. Routley, general secretary of the Canadian Medical Society, said.

The shipments of livestock from Western to Eastern Canada during the first 17 weeks of 1934 and 1935 (after figures within brackets) were: Cattle, 29,267 (12,135); calves, 164 (19); hogs, 82,908 (118,992); and sheep, 40,423 (32,245).

Low Price For 'Planes

Britain Sells Reconditioned Fighters For Two Hundred Dollars Each

Aeroplane entirely reconditioned and capable of doing 120 miles an hour, price—\$200. The British air ministry has sold many of these aeroplanes at prices usually given for second-hand cars. They originally cost \$20,000 and were built as fighters, with engines which cost at least \$5,000. They are in perfect condition and are almost as airworthy as when new.

There is one which is now on offer for \$250, but for the extra \$150 you get a spare engine, two spare wings and the all-important certificate of airworthiness. The engines are of a world-famed make and in tip-top condition.

These machines and engines are obtainable at these crazy prices because they have been superseded by later fighting models. While light aeroplanes can be used fairly cheaply, these powerful machines cost so much to run that few private owners can afford to gain them.

Scientists have been unable to determine the principal group of animals to which the guinea of the African plains is most closely related. It bears a close resemblance to three other animal species, the horse, the antelope and the ox.

A bee has been found to travel 42,770 miles in gathering one pound of honey.

Plenty And Poverty

Canada's Well Stocked With Nourishing Foods

If old man "Famine" should drop in unexpectedly he would find Canada's public ice boxes well-stocked with nourishing foods.

According to a recent bulletin the butter in cold storage warehouses and creameries on May 1st amounted to 2,515,091 pounds of creamery and 11,481 pounds of dairy, the creamery butter total including approximately 330,000 pounds reported by firms added to the list since March 1, 1934. Cheese stocks total 9,863,432 pounds. Eggs in cold storage amount to 3,105,377 dozen; fresh eggs 610,814 dozen, and frozen eggs 828,126 pounds. Fresh pork not frozen 3,527,727 pounds; fresh frozen 11,259,792 pounds, and cured or in cure 17,234,675 pounds. Pure lard in storage amounts to 3,609,702 pounds. Beef stocks total 4,203,621 pounds of fresh frozen; 4,346,036 pounds of fresh not frozen; 191,591 pounds of cured, and 108,272 pounds of beef in process of cure. Fresh frozen veal total 513,318 pounds; fresh not frozen 642,809 pounds. Mutton and lamb stocks total 1,786,058 pounds of frozen and 137,135 pounds of not frozen. Poultry stocks are as follows: Broilers, 87,709 pounds; chickens, 2,278,577 pounds; fowl, 675,779 pounds; ducks, 78,678 pounds; geese, 70,455 pounds; turkeys, 2,160,294 pounds; and unclassified poultry, 596,719 pounds. Fresh and frozen fish "on ice" total 5,430,590 pounds and there are also 3,035,414 pounds of smoked, dried, pickled or salted fish.

Definite adoption of a pacifist attitude and commitment of the organization of public opinion in the interests of peace was made at Toronto at the conference of the Association of Canada Clubs.

Little Journeys In Science

SPONTANEOUS COMBUSTION

(By Gordon H. Guest, M.A.)

Combustion of a fuel has been shown to be the rapid chemical combination of the material with oxygen, accompanied by the production of heat and light.

The temperature to which a substance must be heated before it will burn is known as the ignition or kindling temperature. We know that paper and wood will ignite more easily than coal. When we use a match to light a fire, we rub the match-head until friction has heated it to its kindling temperature, and the tip burns. The heat of the burning tip raises the temperature of the stem to its kindling temperature, and so the process continues until the wood or coal reaches its kindling temperature, and burns. As long as a substance is cooler than its kindling temperature, it cannot burn.

Sometimes we have a slow combining of oxygen with a substance which develops into active burning, and is known as spontaneous combustion. Scientists have shown that a given weight of material, for example, iron, in combining with oxygen to form a certain oxide, will give off the same total amount of heat whether the union proceeds rapidly or slowly. If the combining goes on slowly and the heat goes off, little rise in temperature will be observed. But if the material is a poor conductor of heat, we find that the heat accumulates until the kindling temperature is reached and burning commences. Such a situation often arises when rags soaked with the oils used in making paint (linseed oil and turpentine) are left lying about. Instead of being placed in a metal can, or, better still, burned. These oils, in "drying," combine with oxygen from the air, and turn into a tough resin-like material. Rags being poor conductors, the heat developed finally sets the mass on fire. Fires in coal bunkers and hay stacks arise from the same cause—a slow combination with oxygen, with the accumulation of the resulting heat until the kindling temperature is reached. The heat of the burning carcass of the whale has been known to take fire spontaneously due to the union of oxygen with fat.

To Visit Australia

Duke Of Gloucester To Make Extended Tour In September

The British government has announced that the Duke of Gloucester will leave for Australia in September aboard the H.M.S. Sussex and will spend four days at Colombo, Ceylon, before continuing to Perth, West Australia, where he is due October 5.

He will arrive at Melbourne, Victoria, two days later and will open officially the centenary celebration of the state of Victoria.

His Royal Highness will sail December 10 from Brisbane, Queensland, going home via New Zealand where he is due December 15. He will leave that Dominion at the end of January and proceed via Bay of Islands for deep sea fishing.

He will visit Fiji, Western Samoa, sail through the Panama canal and possibly touch Jamaica en route to England.

The Duke of Gloucester, the king's third son, will go to Australia instead of his younger brother, Prince George, who visited South Africa in the spring.

Power From The Clouds

Hope To Obtain Electrical Energy From Lightning

Studies of the various phases of lightning and thunderbolts have been undertaken by Dr. B. F. J. Schenland, director of research for the Institute of Electrical Engineers, at Johannesburg, South Africa, with the hope that knowledge of the mechanism and nature of thunderbolts may enable man to utilize at least part of the tremendous electrical energy being constantly built up in the clouds and discharged to the earth.

The United States is represented in 15 foreign countries by ambassadors.

ANXIOUS MOMENTS

The Chancellor of the British Exchequer has many demands on his Budget surplus.

More Valuable Than Gold

New Zealand Miner Found Feathers Of Extinct Bird

Treasure more valuable than gold has been found by a gold miner in New Zealand. It is a box of 70 feathers of the now extinct hula bird. Experts say that the Maori, who collected the beautiful feathers to adorn their chiefs, must have hidden the box more than 100 years ago. While working on the bank of the Molyneux River, the miner found a package sixteen inches long. There was an outer wrapping of finely woven flax matting, an inner of native cloth made from the bark of a tree, and inside was a roughly-cut Maori box with its handles of feathers. The "hula" bird has not been seen alive in New Zealand for 40 years. To the Maori of old, who never learned the art of working metals, these feathers were more precious than gold, and they are acclaimed so by modern New Zealanders.

Recipes For This Week

(By Betty Barclay)

LEMON MUFFINS

Juice of one lemon

1 egg, beaten

1 cup sugar

4 teaspoons baking powder

1 cup milk

2 cups flour

1/2 teaspoon salt

Cream lard, sugar and salt, together. Add egg, then milk, last baking powder and flour sifted together three times, then lemon juice. Beat until smooth. Bake in hot oven about 25 minutes. This will give you 12 to 15 delicious muffins.

ORANGE BANANA SALAD

(Serves 6)

6 oranges

2 to 3 bananas

Lettuce

Peel oranges, removing skin down to juicy pulp. Cut in slices and cut slices in half. Peel bananas and slice them. On individual salad plates, covered with beds of shredded lettuce, arrange alternately half slices of oranges and banana slices. Centre with a pat of boiled dressing and a banana half or cherry, if desired.

Advice From Tibet

Newspaper Tells World How To Restore Good Times

Tibet's only newspaper, which comes out once a month, knows just what is the matter with the western world. It is called The Mirror of Events in Every Corner of the Globe. It asserts that the economic crisis has been caused by wheels, because machines "enable two men to do the work of 20,000." Unemployment means no money and lack of money kills trade, the argument runs. The western world is warned that it must suppress wheels before it can have better times.

Produced In Dominion

Canadian National To Feature Home Grown Foods On Dinner

Distinctive Canadian foodstuffs and dairies in their proper season will be a feature of the table d'hôte meal service on the trans-continental trains of the Canadian National Railways, commencing with the abolition of a carte menu on these trains, stated W. W. Swinden, general superintendent of sleeping, dining and parlor car services on the National system. Sea foods from the Maritime provinces; meats, including the famous Ontario spring lamb; fresh-water fish, including Lake Winnipeg goldeyes, and fruits from the Maritimes, Quebec and Ontario, and the famed Okanagan valley of British Columbia will all be featured in these plate service meals at appropriate seasons.

Completes Wonderful Clock

Marvin Shearer, 70-year-old inventor of Akron, O., has completed what he believes is the world's most wonderful clock. The instrument tells the time in 27 large cities, sings, talks, and plays a reelless pipe organ each hour. The clock, valued at \$50,000, took 10 years to build, contains 5,000 pieces of wood and several miles of electric wiring.

The famous European news agency, "Reuter," started business some 90 years ago with a pigeon post service.

SUNDAY SCHOOL LESSON

JUNE 10

JESUS ON THE CROSS

Golden Text: "Looking unto Jesus the author and perfecter of our faith, who for the joy that was set before him endured the cross, despising shame, and hath sat down at the right hand of the throne of God." Hebrews 12:2.

Lesson: Matthew 27:1-66.

Devotional Reading: Psalm 22:1-5, 14-19, 27, 31.

Explanations And Comments

The Crucifixion, verses 32-38. They led Jesus away to be crucified, going outside the city limits, as was the custom (Acts 7:58), to a knoll called Golgotha, whose name means "the place of the skull." We call the place Calvary, from the Latin word calvaria, a skull. There they offered him wine mingled with gall, a narcotic, for 29, 27, that he declined it. Then they crucified him. "The astonishing thing is that the crime was not committed by criminals. It was not the underworld that crucified Christ. It was the world of average men, the world of his day. Nor was that world to be dismissed as barbaric or anarchist or atheist or communist. On the contrary, it represented the highest civilization upon this planet, and the civilization included a government, armed forces, a judiciary, commerce, religion, art, education, and pleasure. It was a world of Roman law, of Greek culture, and of Jewish faith. This is the mystery of iniquity that we have to explain." (P. Whitwell Wilson).

The Death, verse 50. "Yet again Jesus cried with a loud voice, 'Eli, Eli, 23:46 records the words: 'Father, into thy hands I commend my spirit,' and yielded up his spirit. 'Immediately my heart sings a new song.' 'O Jesus, Lord! 'is joy to know Thy path is 'o'er of shame and love, For us so meekly trod.' Eternity cannot suffice for the unfolding of the mystery of the passion, but this I know, he bare my sins in his own body on the tree." (G. Campbell Morgan).

Power From The Clouds

Hope To Obtain Electrical Energy From Lightning

Studies of the various phases of lightning and thunderbolts have been undertaken by Dr. B. F. J. Schenland, director of research for the Institute of Electrical Engineers, at Johannesburg, South Africa, with the hope that knowledge of the mechanism and nature of thunderbolts may enable man to utilize at least part of the tremendous electrical energy being constantly built up in the clouds and discharged to the earth.

Completes Wonderful Clock

Marvin Shearer, 70-year-old inventor of Akron, O., has completed what he believes is the world's most wonderful clock. The instrument tells the time in 27 large cities, sings, talks, and plays a reelless pipe organ each hour. The clock, valued at \$50,000, took 10 years to build, contains 5,000 pieces of wood and several miles of electric wiring.

Did You Ever Stop to Think

just what a ten-dollar bill which a farmer spends in his home town may accomplish? Let us follow it around. Probably the dry goods merchant gets it first. He passes it on to the hardware merchant in payment of an account. The hardware merchant pays it in wages to one of his employees. This employee pays it to his landlady, who pays a grocery bill with it. The grocer can then pay his butcher. The butcher passes this on to his produce merchant, and this produce merchant, buying largely from the farmer, passes this ten dollars back to the farmer, from whom it originally came. Thus it has, in its ramblings among the home town people, served many useful purposes and yet it is still in the community to again serve.

If Sent Away to Distant Merchants

That ten-dollar bill is gone for good. It may serve to build up the large city elsewhere. But so far as the home community is concerned its usefulness is at an end, and the community has been drained of just that much working capital.

When in Need of Printing

—Remember that orders left with your home town printer will serve to pay wages of workmen who in turn spend this money with local business houses, thus serving to maintain that round of business which is necessary in order that rural towns throughout Canada may flourish and prosper.

*Remember your local printing office
when in need of printed matter*

SAFER HEADLIGHTS

With motor cars travelling at higher speeds each year, the need for powerful illumination has increased. At the same time the need for properly protecting oncoming drivers from dangerous and illegal glare has increased. Automobile engineers have met this double problem in the 1934 models by a multi-beam combination for country, city and passing in which eliminates glare and yet provides sufficient light where it is most needed. For country driving a strong beam from each light stretches far ahead and spreads each side of the road. When passing approaching cars, the left hand headlight is depressed to flood an area close in front at a level below the eyes of the approaching driver. The beam from the right hand headlight is thrown ahead as before with that portion that would shine down the left-hand side of the road masked off by the lens. This provides a strong beam that will illuminate objects on the right side of the road.—E.S.

ALUMINUM

Aluminum seems likely to be the medium of the next great development in the metal world. Metallurgists are directing their attention to the extension of the uses of this metal, and a number of new applications have recently been discovered. A leading American scientist has predicted that the next metal age will be the aluminum age, and that the world production of aluminum will be doubled in the next decade. The highest production of the metal in the past has been about 300,000 long tons. Canada now holds second place among the countries engaged in the production of aluminum. Aluminum ores have not been found in commercial quantities in the Dominion, but her abundant water powers give her a powerful advantage in the extraction of the metal. Canada also possesses a growing industry for the manufacture of aluminum products.

BELLEVUE HAPPENINGS

Miss Enea Chiarevano left Sunday for a three month's visit to Edmonton and other points in the north, to end her vacation at the summer school at Edmonton.

Gordon McIntyre, of Olds, visited his sister, Mrs. D. Hutton, on Sunday, returning the early part of the week.

Miss Marjorie Rhodes, who had been visiting here with her parents for a month, returned to Winnipeg on Saturday, where she is a nurse-in-training at Grace hospital.

Joe McLean left Monday for Merritt, B.C., where he will visit for a couple of months.

The Mine Workers' Union held a largely attended meeting on Tuesday evening, to discuss the conveyor system at the mine, which they claim is causing considerable dissatisfaction.

Mrs. J. H. Marsland, of Passburg, left Sunday for Vancouver, to spend the summer with her daughters.

Re-planting of beans and other garden stuff is proceeding, rain or no rain, since the frost of Saturday. Some of the gardens were badly hit.

Simon Rymaker and his father were visitors to Lethbridge on Saturday.

Mr. and Mrs. Albert Goodwin, who had spent a couple of months in Calgary, the former a patient at the Holy Cross hospital, returned home on Friday. Mr. Goodwin is much improved in health since his operation.

Mrs. F. Padgett and Mrs. J. Shevels are at Lethbridge attending the Eastern Star Grand Chapter sessions.

Mr. and Mrs. L. Dambos, who have been in Calgary for about six months, have returned. Mr. Dambos was a patient in hospital for treatment for injuries sustained in the mine here.

Mrs. E. W. Christie, who spent some time in Lethbridge with her son Bill, returned home on Saturday.

Miss C. Marcelin, local postmistress, has been confined to her home for the past two weeks through illness.

Mr. and Mrs. W. Cole, junior, returned home Thursday from their honeymoon trip to Victoria, and are receiving congratulations from their many friends.

Bellevue and Blairmore football game here on Saturday ended 1-0 for Bellevue. Fraser, in goal for Blairmore, saved his team mates from a bigger beating. Kimberley plays here on Saturday.

HILLCREST HAPPENINGS

The Hillcrest football team were defeated 2-0 by Coleman on Saturday.

Mr. and Mrs. W. Stevenson were Calgary visitors last week.

Mrs. W. Adam went to Lethbridge on Tuesday.

Mr. and Mrs. M. B. Walker are holidaying in Chicago.

Misses Peggy and Dorothy Calderwood left on Friday for Vancouver, where they will reside in future.

The annual smoker of the Hillcrest Rod and Gun Club will be held on Friday evening.

Mr. and Mrs. Webster and family motored to Mountain View last week end.

Mary Davies returned from Calgary on Friday.

KING'S FAVORITE QUOTATIONS

The following are six favorite quotations of His Majesty King George V., which hang in his workrooms in Buckingham Palace and Sandringham:

1. Teach me to be obedient to the rules of the game.
2. Teach me to distinguish between sentiment and sentimentality, admiring the one and despising the other.
3. Teach me neither to offer nor to receive cheap praise.
4. If I am called upon to suffer, let me be like a well-bred beast that goes away to suffer in silence.
5. Teach me to win, if I may; if I may not, teach me to be a good loser.
6. Teach me neither to cry for the moon, nor to cry over spilt milk.

ONLY 45 MINUTES 51

SECONDS ACTUAL PLAY

(By Maroon)

Would you believe it? There were only 45 minutes, 51 seconds of actual football in the Scottish Cup Final at Hampden yesterday.

I went to the match armed with a stop-watch. Here is what it showed: Total loss of time through stoppages—44 min. 9 sec. made up as follows: First half, 21 min. 6 sec.; second half, 23 min. 3 sec.

The total number of stoppages was 170. 78 in the first half and 92 in second half.

This table shows the loss of time by these stoppages:

Bye-kicks	8 minutes 51 seconds
Corner-kicks	4 minutes 5 seconds
Throw-in	13 minutes 3 seconds
Free-kicks	9 minutes 42 seconds
Offside	1 minute 22 seconds
Injuries	3 minutes 38 seconds
Goals	3 minutes 15 seconds

The largest stoppage was one of 70 seconds, when McPhail was injured after Smith had scored in the second half.

Tom Hamilton took only one bye-kick in the first half. It occurred after 37 minutes.

There were only five offside decisions—three in the first half; two in the second. Four were against Rangers.

There were 28 bye-kicks—Rangers 10, St. Mirren 18.

14 corners—Rangers 10, St. Mirren 4.

79 throw-ins—Rangers 40, St. Mirren 39.

29 free-kicks—Rangers 16, St. Mirren 13.

There were also seven stoppages for injuries.

1934 OLDSMOBILE SIX

The 1934 Oldsmobile Six, on display today for the first time at Crows' Nest Pass Motors, is described as an "all-feature" Six. One of the features is the price, which is down on the low bracket, bringing the Oldsmobile Six into the field of volume sales.

A successful year for the Oldsmobile Six seemed assured from the moment volume models on display at the motor shows, where, incidentally, they won a style census award against all comers in their class. Other features noted, besides price and style, are the 34-horsepower engine, which smoothly accelerates from 5 to 60 miles an hour in less than half a minute; knee-action front wheels, super-hydraulic brakes; silent gears at all speeds and more miles per gallon.

Undoubtedly, it is the Oldsmobile Six's stylish lines that have made it a favorite at the pre-view. The hood is longer, and the new radiator grill slopes at a decided angle from top to bottom. The windshield has a rakish, rear-ward slope. Two torpedo-shaped louvers on each side of the hood

are integral with the hood panel. The small diameter long bullet-shaped headlamps add a harmonious touch.

The crowns of the fenders have been lengthened and the corners of the valances rounded off.

The Oldsmobile Six has gone far along aero-dynamic lines without touching the extreme.

The bodies by Fisher, all with individually-controlled no-draft ventilation, have more than the usual number of luxurious features. The wheelbase of this car is 114 inches and plenty of leg room, arm room and head room have been engineered into the interiors.

Body models available are: standard coach, special coach, standard coupe, 4-passenger special coupe with rumble seat, 4-passenger standard coupe with rumble seat, 5-passenger special coupe with trunk, standard sedan, special sedan with trunk.

He asked for a kiss. She blushed. He answered the call to the colors.

A Style Leader in the Low Price Field

1934 MODELS ANNOUNCED

Models of the 1934 Oldsmobile Six, winner of style census at leading motor shows, are now in the hands of local dealers. This car has created a sensation by dropping into the low price field, though it is described as an all-feature Six, with individual front wheel suspension, super-hydraulic brakes, and most modern body lines. The sedan is shown above, and the special coupe with rumble seat below. Top left, cutaway view of the sturdy knee-action front wheel unit.

OLDSMOBILE
enters the LOW-PRICE FIELD with a brilliant
NEW ALL-FEATURE SIX

KNEE-ACTION WHEELS

Each front wheel is mounted independently and cushioned on a coil of its own—controlled by a double-action hydraulic shock absorber. Wheel's "walk" over bumps eliminate jar and bounce.

RIDE STABILIZER

Prevents sway when rounding curves. The new Oldsmobile is always in balance; even when you take a sharp turn you remain comfortable; passengers will not careen against cushions.

ADDITIONAL BIG-CAR FEATURES
Super-Hydraulic Brakes... Fisher No-Draft Ventilation... 34-horsepower engine... All-Streamlined Fisher Bodies... Centre-Control Steering... Synchromesh Transmission, silent in all gears... Safety Glass Windshield and Ventilators.

"SALINA" TEA

"Fresh from the Gardens"

That "Bought And Paid For" Idea

There is a curious persistence in the idea current in certain parts of Eastern Canada, that the older provinces of Confederation have proprietary interests in the prairie provinces by "rights of purchase."

Just recently, a storm which ranged West against East, broke in the House of Commons at Ottawa—where relief and other expenditures required by Western Canada were under consideration. During the discussion, the "bought and paid for" mentality was prominently in evidence, according to newspaper despatches. It appears inevitable that, when any expenditure which may be construed as exclusively Western, is mooted in the federal parliament, some member from one of the older provinces, impelled by this idea, seems bound to object on the ground that the prairie provinces are not entitled to further consideration—and terms such as "blood-suckers" are applied, indiscriminately and with reckless abandon, to governments and people of the West.

Forgotten is the heart of debate is the amazing fact which the West has played in the material advancement of the Dominion. Forgotten, for the time being, is the gigantic contribution which the wheat-growing prairies have made to the wealth of Canada. Forgotten are the tremendous expenditures made, by the Dominion as a whole, for works, projects and purposes which may be construed as exclusively Eastern. Forgotten is the use made of the resources of the West in the building of great transportation systems of advantage to the whole of Canada. Forgotten is the influence of prairie purchasing power upon the industrial development of the East. Forgotten, too, is the fact that the West's present needs are due to the dire extremity of many of its people—a condition they certainly did not seek and did nothing to create. The "right of purchase" idea reigns paramount over all others when tempers are frayed and local zeal is in the ascendancy. In one breath it is admitted that the prairie section has contributed more to the wealth of Canada in a specified period than any other component part of the Dominion. In the next, the prairies are branded as "blood-suckers," draining, as it were, the coffers of Canada which, by implication, apparently are filled solely by the contributions made by the older, Eastern provinces.

The idea, of course, has its roots in the historical charter granted by Charles II. of England, in 1670, to the Hudson's Bay Company, which conferred upon that company "rights in the territory tributary to the river draining into the Hudson Bay"—including property rights and rights of government. These rights the company exercised in the territory known as Rupert's Land for some two hundred years.

When, however, Confederation became an accomplished fact in 1867, the Canadian parliament, pursuant to the great vision of a united Canada stretching from ocean to ocean, initiated negotiations with the Imperial Government at London with a view to acquiring possession of the territory held under this charter by the Hudson's Bay Company. The British Government agreed to the request on condition that the arrangement entered into would not involve expenditure by the Imperial Treasury, and on the further condition that there should be no surrender of territory until the terms had been agreed upon.

Negotiations with the Company proceeded for two years, during which time it held out for a cash payment of \$300,000 (approximately \$1,500,000), as one of the terms under which it was prepared to relinquish its rights in the territory. The Canadian Government, then representing the original provinces of Confederation, borrowed the required sum on bond issues which matured in 1904. The money being paid, the Company surrendered its rights under the charter, and Canada stretched one and indivisible from the Atlantic littoral to the Pacific seaboard. That is the story, that the genesis of this "bought and paid for" idea which crops up, ever and anon, during debate in the federal parliament.

Obviously, \$1,500,000 is a ridiculously small sum against which to assess a claim of proprietary rights of purchase in the entire prairie section of Canada. It is ridiculously small in proportion to the wealth produced normally each year in the far-flung western end of the West. It is ridiculously small not only in proportion to the contribution made by the "purchased" territories to the aggregate wealth of the Dominion. It is ridiculously small in comparison with the annual contributions made by the Western provinces to the revenues of Canada. That the idea should survive at all in the face of recent history is incomprehensible to Western minds. That it should be used to justify opposition to present claims of certain sections of the prairies for aid in their extremity, demonstrates not only the mental poverty of the objector, but a naive ignorance of obvious facts. Recent economic experience has proved that, instead of the East holding the West in fee, the reverse is closer to the truth.

Italy To Build Battleships

Three Large Fighting Ships To Be Built Under Washington Treaty

Italy will construct three large battleships, with general specifications similar to those of the French battleship Duquesne, it was disclosed by naval officials.

The new vessels will be completed by 1940 and will cost about \$85,000,000. Their construction will be part of a program outlined by Premier Mussolini in an address before the chamber in which he stated that Italy proposes to utilize the 70,000 tons allowed Italy under the Washington treaty.

The premier estimated the expenditure will total 1,000,000,000 lire. This capital expenditure will be in addition to appropriations to modernize old battleships between now and 1940.

Life-Saving Ducks

Battled Round Companion And Rescued It From Mud-Turtle

Many birds have a lot more sense than people give them credit for, according to a man from Minnesota. He tells, for instance, that last year he saw a lot of his ducks in a huddle in the middle of the little lake on his farm. They were settling up such a clatter that he took a rowboat and went out to see what was up.

In the centre of the huddle was a duck more than half under water being dragged down by a huge mud-turtle that had it by the foot. The other ducks were pressed as close as they could get in an effort to hold it up as long as possible, meanwhile sending out distress calls as best they could. A rescue was effected and the ducks disbanded.

Household Drudgery
The Bane of a Woman's Life

Nature intended women to be strong and healthy instead of weak and sickly, but how can a woman have good health when she has to go through the household drudgery without any relief? It is only when she becomes nervous and irritable, has bad flashes, faint and dizzy spells, shortness of breath, and when she is unable to sleep at night.

Women who are weak and run down will find in Milburn's H. & N. Pills a remedy to strengthen the system and bring back the much desired health.

World's Largest Flying Boats

Russia Leads With Britain Second And United States Third

Like everything else airplanes are becoming larger and more powerful. The honor of having the biggest goes to Russia.

The Russians have almost completed at Moscow a flying boat—it might be called a flying liner—to be named the "Maxim Korki." It will provide accommodation for 70 passengers, and will have a crew of six. It will have a moving picture "auditorium," and a room for developing photographs. The pilot will sit in a conning tower above the wings so that he will have an uninterrupted view.

Great Britain furnishes the second largest, the "Byla," which is almost ready. It will carry 30 passengers and a crew of five. Among other things it will have a smoking compartment.

The United States comes third with the S-42, built at Bridgeport, Conn., by the Sikorsky Company. It carries 32 passengers and a crew of five. It has a full-load range of 1,250 miles non-stop, and can also carry 1,000 pounds of freight.—St. Thomas Times-Journal.

"PERSONS NOT FAT LIVE LONGEST"

Eminent Physician Declares

In a recent lecture before the American Academy of Medicine, a prominent physician stated that persons who aren't fat live the longest.

Common sense confirms this. Insurance companies often reject overweight folk, or charge higher premiums on account of the risk. Fat crowds and weakens body organs—it slows you down and puts unnecessary strain on the heart. A host of ailments (even rheumatism, acidity, shortness of breath and lassitude) are often associated with fat.

So get rid of this dangerous, unhealthy fat. There's no reason why you shouldn't, when science has given you this safe, effective treatment—a half teaspoonful of Kruschen Salts in a glass of hot water first thing every morning.

This healthful "little daily dose" of Kruschen keeps the system free from harmful toxins. It helps to re-establish normal and proper body functioning—it keeps you feeling fine and fit all the time. Energetic activity takes the place of sluggish indolence all while you lose excess fat gradually and without discomfort.

Vaccine For Tuberculosis

New Preparation Being Tested On Cattle In Ireland

Experiments to find a cure for tuberculosis in cattle continue in various parts of the world. The Spallinger vaccine, of which much was heard two or three years ago, is still undergoing tests, the most recent of which have been made in Northern Ireland under official auspices. The calves vaccinated with the Spallinger preparation have survived the injection of heavy doses of tubercle infection and are thriving, while untreated calves have succumbed.

As the United Kingdom is now embarking on a national campaign to clean up her dairy herds and to eradicate tuberculosis, the final results of the Ulster trial seem likely to offer an economical and practicable means of immunising dairy cattle against tuberculosis, and generally ridding the country of a scourge which is costly to public health and farmers.

Dwarfs Holding Congress

Likely To Take Place In Budapest Next Year

Fired by the Nazi doctrine of racial purity, dwarfs of Hungary have formed a National Union of Hungarian Dwarfs and have invited all the dwarfs of the world to a Dwarf Congress which is to be held, probably in Budapest, next year. Their creed is to "preserve the purity of the dwarf race," to forbid marriage with normally-sized people, and to demand lower fares and smaller houses for all tiny folk. Their leader, Herr Hitler, is said to be 30 inches tall.

Invention For Radio Fans

Dr. Nevil M. Hopkins, of New York University, is the inventor of a new electrical device which he claims will revolutionize the radio broadcasting industry. He calls it the "telecasts" and by use of this instrument, a listener-in on a broadcast can, by pressing a button, immediately transmit to the station his reaction to the program being presented.

All tree squirrels make nests of twigs and leaves among tree branches.

Fulfilling Father's Hopes

Captain Scott's Son Makes Study Of Natural History

Twenty-two years ago Captain Scott, one of the greatest English explorers of all time, lay dying in a tent in the Antarctic.

The last letter he wrote was to his wife. He spoke of their infant son Peter. "Make the boy interested in natural history if you can," he said. "It is far better than games."

Peter Scott is 24 now. He has fulfilled his father's hopes. Recently he opened in Bond street, London, his second exhibition of paintings of bird life.

The grey light of dawn is there; so are the mudflats, the almsous creeks, the ebb of the tide, and eerie, plaintive noises. The curlew calls; you can hear the piping of, weakening redshank and stint. Grey geese rise V-shaped into the sky and flight shoreward to the fresh marshes of the mainland.

It is a world of thrills to the mere wildflower. It is a world of excitement for the witless naturalist, which is what Peter Scott has become.

He shoots little now, as he maid recently, but night and day, the winter through, lies in a scooped-out hole in the snow, or huddles in a pit in the salt marshes, waiting to catch the fleeting visions he has captured in paint.

The Grasshopper Campaigns

Provincial And Federal Organizations To Deal With Menace

The Canadian Insect Pest Review for May of the Dominion Entomological Branch in the 1933 summary of insect outbreaks of that year states with reference to grasshoppers that control campaigns involving the use of poisoned baits were actively carried out in most areas, and, despite difficulties, resulted in the destruction of vast numbers of grasshoppers and the material saving of crops.

In July and August, extensive dispersal flights of grasshoppers occurred in many parts of the insect region, as a result, practically all of the open prairie land of the three Prairie provinces is now involved, and the areas of severe infestation have been considerably extended, except in Eastern Manitoba where there has been an encouraging report. It is expected that during 1934 the outbreak will be even more intense and destructive than that of 1933, and consequently Provincial and Dominion authorities are organizing a comprehensive campaign to deal with it.

Dredging For Gold

Work To Be Started On Yugoslav-Rumanian Border

Modern miners are to attempt to dredge the River Pek on the Yugoslav-Rumanian border, on the bed of which gold has been collecting for more than 2,000 years. Up this river sailed Jason and his Argonauts from the Bæa Sea, and the Golden Fleece of their quest is no legend today, for the peasants of the Pek River Valley steep sheepskins in the water and after a few weeks pull out golden fleeces, the alleval gold brought down from the mountains by the water having settled in the wool. It was said that Alexander found all the gold for his expedition in 328 B.C. Firms of many nations have made bids to supply the dredging machinery and the operations are expected to be extensive.

A Closely Guarded Secret

Germany is closely guarding its experiments with "radio-controlled" airplanes. It is reported that successful flights were made by a machine entirely without a crew, direction being entirely by radio. The tests were made under greatest secrecy, and officials refuse to divulge any information.

"Too bad about Jane and the man she's engaged to. Neither one of them is good enough for the other. "Where did you get that idea?" "I've been talking the matter over with both families."

The world is wide, but there are lots of narrow people in it.

for CORNS & WARTS

Remove dry skin. Dip on Milner's 3 times daily. Let it dry. It will cure a whole corn and wart.

Still Works At Ninety

Blacksmith Not Idle Even If Son Runs Business

Partnership of Kemp and Son, village blacksmiths at Worlington, England, has been, to quote the official notice, "dissolved by mutual consent," but a man who worked hard as a blacksmith even in his nineteenth year will not be altogether idle. It was not lack of business that caused the firm to dissolve. Far from it, but simply that Samuel Kemp was 90 and came to the opinion that his boy, James, was old enough to carry on. Samuel Kemp, however, does not intend to retire, "because," he says, "you can't trust these boys." He has finished 78 years continuous work at the forge. Up to the time the official notice of the dissolved partnership was published he used a sledge hammer. Next day he was soldering kettles.

Canada's Agricultural Revenue

Decrease Last Year Of Over Four Million From Previous Year

The total gross agricultural revenue of Canada for 1933 is estimated at \$762,202,000 as compared with revised estimates of \$766,794,000 for 1932, and \$836,114,000 for 1931. This represents a decrease of \$4,492,000, or 0.6 per cent, from 1932. There are increases in the revenue from farm animals, wool, dairy products, fur farming, honey, clover, and grass seed, and decreases in the revenue from field crops, fruits and vegetables, poultry and eggs, maple products, tobacco, and flax straw. The greatest increases are from farm animals and dairy products, while the biggest decreases in revenue are shown in field crops and poultry and eggs.

Greatly Increased Riches

Higher Gold Price Made Vast Difference To Indian Prince

It is due largely to President Roosevelt that an Indian prince, the Nizam of Hyderabad, is much richer than he was a year ago. Locked up in his strong-room is a vast store of gold in coin and bullion. Early last year its value was estimated at \$500,000,000. Since then the price of gold has increased about 60 per cent as a result of the action of the United States in fixing a higher price for gold. The Nizam's hoard is now estimated worth \$800,000,000.

Has Regular Zoo

Pity the prowler who breaks into the room of Kenneth Johnson, University of California student. Johnson, who aspires to be a zoo keeper, keeps eight snakes, a black widow spider, and a Gila monster in his bedroom. The pets have the run of the bedroom. Johnson studies the best way to make them happy, and improves their intelligence by running them through mazes.

Good Friend To Horses

When Policeman M. Edwood prosecuted John Hill, a grocer, for cruelty to a pony it made the 1013th equine he had befriended in court. Edwood has been on the London force for 30 years. A lover of horses, he watches for cases of cruelty and brings the offenders before the law.

Dreams Of A Startling Future

Nicola Tesla On Verge Of Announcing New Discoveries

It is all very hazy, of course, but when Nicola Tesla says he "is on the verge of announcing a new invention of incalculable benefit to the world," the world is warranted in sitting up and taking notice. For the wonders that Tesla has performed in the past are to be considered as an indication of the wonders he may perform in the future. The Italian genius says he is prepared to startle the world with four new inventions which are likely to provide him with many millions. With these millions he will proceed to put some of his earlier discoveries on a commercial basis. Chief among these, we take it, he rates the transmission of power by wireless. . . . Tesla remarks that with his discovery put on a commercial basis, the flying machine of tomorrow, freed from the gasoline motor, will have unlimited cruising radius by drawing on transmitted power. And, of course, that would be only one of many possible wonders. Electricity reduced to terms of power already enters into our daily lives in so many forms that the field awaiting development of Tesla's wireless power transmission is practically without limit. So, although, as we said at the outset, the Tesla announcement is somewhat hazy, it is clear enough to start vivid dreams of a startling future. — Buffalo Courier.

Belgium Looking To Her National Defence

John Countries Who Have Given Up Disarmament Idea

Add Belgium to the list of countries, large and small, which have abandoned all talk of disarmament and are concentrating on the reverse. In Belgium the chief political issue just now seems to be the exact nature of the policy of national defence which shall be adopted. Within the past year and a half this small power has spent no less than \$50,000,000 defending its German border.

Thus Europe marches toward the ideal of bigger and better armaments. It may in the end mean death to a great many, but in the meantime, it is at least helping the armament contracts to maintain production at a satisfactory high level.

Islands in a river, unless caused by rock outcrops, are continually travelling downstream as the current cuts at the upstream end of the island and deposits at the other end.

There never yet was a sermon that beat a good example.

HAMILTON, ONTARIO

BANKS OBJECT TO GOLD CLAUSE IN THE NEW ACT

Ottawa.—Strenuous protest against those provisions of the Bank of Canada Act under which the chartered banks must transfer their gold holdings to the new institution and sacrifice the premium in so doing, was made in the House of Commons banking committee.

S. H. Logan, general manager of the Canadian Bank of Commerce, laid before the committee the protest and arguments of the Canadian Bankers' Association.

"I protest strongly against the forced transfer of gold from the chartered banks at a figure far below that at which it is valued in the world markets, instead of at a price reflecting the ruling premium," declared the banker after citing his reasons. "If the government considers this gold is necessary for the successful operation of the Bank of Canada, the government should buy it at its fair market value, as is done in the case of gold from our mines, and dispose of it to the central bank on such terms as it may arrange."

The other side of the case was put by Hon. E. N. Rhodes, finance minister, and Dr. W. C. Clark, deputy minister of the department. In 1931 the Dominion government had prohibited gold export and, at the same time, stopped redeeming Dominion notes in specie. They had not done this, the gold reserves of the banks would have been wiped out, they claimed.

The second argument was that when Canada refused to redeem her notes in gold, the people generally and not the banks had suffered through depreciation of the Dominion's currency abroad. In view of this fact, it appeared reasonable the Canadian people should be the beneficiaries through the rise in the value of gold and the consequent premium earned, they said.

The bill provides that the gold in the chartered banks held in connection with their domestic business shall be taken over by the central bank at the par rate of \$20.67 per ounce, whereas the market value around \$35. Gold held by banks against outside business will be left with them. Any profits made by the central bank in the sale of gold at a premium goes to the Dominion treasury.

To Save Livestock

Manitoba Government Will Transport Cattle To New Grazing Areas

Winnipeg.—The Manitoba government has moved to succor approximately 50,000 head of farm stock from starvation and drought.

Seriousness of the feed situation in drought areas in the southeastern portion of the province was placed before executive council of the government and relief measures approved.

The Dominion government and transportation system are asked to co-operate with the province in transporting stock to areas where grazing is good. It is hoped to arrange mass transportation without cost to the farmer.

Relief For Single Homeless

Ottawa.—The federal government contributed \$463,769 for food, fuel, clothing and shelter to single homeless persons in the three prairie provinces from March 31 to July 31 of last year, according to a return tabled in the House of Commons. The amount was divided as follows: Manitoba, \$241,710; Saskatchewan, \$44,493; Alberta, \$177,566. In these cases the Dominion bore 100 per cent. of the relief.

Visits Canada

Quebec.—On the staff of the Prince of Wales, now King George, during the latter's Canadian tour in 1908, Lord Southborough, 74, now a prominent British financier, returned to the Dominion, landing at Quebec from the liner Empress of Australia. Lord Southborough is particularly interested in British Columbia, a province which he holds large interests.

A Strange Phenomenon

Lethbridge, Alta.—A rainbow at midnight was the strange phenomenon witnessed by R. T. Allen and his family at Coalville, Alta., he reported here. The rainbow, the colors of which were clearly defined, appeared across the sky from east to west between 12:30 and 1 a.m. Allen reported. It was a vivid arch.

W. N. U. 2049

French Language On Radio

Objections Are Voted In House By British Members

Ottawa.—Objections of the people of Saskatchewan to the use of the French language over the radio were voiced by F. W. Turnbull, K.C., (Cons. Reginald), to the House of Commons committee on radio. Mr. Turnbull, declaring he was voicing the views of the people of that province, asserted the commission was allowing itself to be made an instrument in promoting the view that French was the official language of the whole of Canada.

A feeling existed in many quarters in his province, Mr. Turnbull declared, that the French people were insisting on rights and privileges to which they were not entitled. The objection in Saskatchewan was that in using French in the broadcasts there, an effort was being launched to make Canada a bilingual country. It was bad for Canadian unity and bad for the French language if such a belief continued.

He had no hostility to French, nor did any hostility prevail in Saskatchewan. However, underlying the whole matter were some fundamental questions. One centred on the belief that, he declared, prevailed largely in Quebec that French was the official language of the entire Dominion. On the other hand, the people of Saskatchewan and in other parts of the country were largely of the opinion the French language was not the official language of Canada, but was confined in its application to the terms of the British North America Act.

Forest Fires Serious

Situation In Timber Lands Of New Brunswick Alarming

Toronto.—While in Quebec and Ontario the bush fire situation was reported as vastly improved, alarming blazes broke out in New Brunswick and 300 people were homeless at Oliver settlement, their quarters licked by flames of forest fires raging through Restigouche county.

The situation was held dangerous enough to warrant a government edict forbidding passage through the province's timberlands.

Backed by a near-gale wind, flames menaced huge timber resources in Cumberland county, New Brunswick, with destruction of a seven-mile stretch of forest behind them. Rain was badly needed. Fires are also raging in parts of Manitoba.

The homes of 16 settlers were destroyed in the new Alceda settlement in Gloucester county, N.B., with Queens, Madawaska, York and Victoria counties all reporting outbreaks also.

Business From Russia

Moscow Proposes To Place Large Orders In Great Britain

London.—The Moscow government proposes to place large orders in Great Britain, if the prices and terms are right, declared L. E. Mather, president of the Anglo-Russian Chamber of Commerce, at the annual meeting of the organization here.

The information was from a reliable source in Soviet Russia, Mather said. Soviet purchases in Great Britain during the first four months of 1934 were two and one-half times larger than in 1933.

Bait Not Sweet Enough

Calgary.—Grasshoppers in Alberta have a "sweet tooth" and farmers are urging the poison bait formula be changed. From Munson comes the report the hoppers are not taking to the poison bait with the usual vigor. It lacks sufficient molasses and has proved unattractive to the grain field pests.

FRANCE OPPOSES THE RE-ARMING OF GERMANY

Geneva.—France has almost administered the finishing stroke to a dying world disarmament conference.

A vigorous British plea that the conference get down to brass tacks, or else quit making speeches and hindering other efforts at solving the troublesome arms question, ran smack into a French stone-wall.

In caustic phrase the veteran French parliamentarian, Louis Barthou, foreign secretary, made it plain France will not consent to any re-arming of Germany—regarded as the keystone of a disarmament agreement—on any conditions.

Opening predictions the conference had only a remote chance of salvation were heard.

Furthermore, an unpleasant reaction from Germany is inevitable. Delegates who are incontestably well-informed, predict it is now only a question of time before Germany openly announces her refusal to be bound any longer by the disarmament clauses of the treaty of Versailles.

The French contend Germany has been actually re-arming anyway, in defiance of the treaty. Barthou, who said Sir John Simon's speech reminded him of his own long-ago "sacred youth," and then by way of some laughter, declared Germany had publicly increased her military budget some weeks ago even while Britain and France were seriously discussing the question of guarantees, which might have solved the disarmament plan problem.

The outline of the French viewpoint was so uncompromising, coming on the heels of Sir John Simon's speech, that some journalists hastened to report it would strain relations between Britain and France.

While it was admittedly received with deep regret in British circles here, the Canadian Press was authoritatively informed suggestions would lead to a breach of the present good relations between Britain and France could be dimmed.

"There is no ground whatever for any such assumption," the authority said.

Barthou's speech was plainly interpreted as meaning that France now does not want any disarmament agreement. Under no circumstances will the French government ever make an agreement, whatever else it contains—security provisions or otherwise—that would permit immediate re-arming of Germany in any degree.

Sir John, speaking privately after the session, admitted the day's "developments" increased the difficulties of reaching any agreement.

The Frenchman seemed particularly aroused by Sir John's stand for conciliation with Germany as a necessary foundation for an arms pact—on the basis of the British plan, and Sir John's frank declarations that if the conference cannot see its way to achieving anything it had better shut up shop.

Referring to the British suggestion that a bridge should be found on the basis of the British plan between France and Germany, the Frenchman declared:

"We are perfectly willing to cross the British bridge, but first we want to make sure that the planks are sound. We will take care not to fall through hidden traps into the stream beneath."

Sir John earlier stressed "the time is long past when we can delude ourselves into imagining that by a pious expression of our desire to reach an agreement we are promoting an agreement."

LIBERAL LEADER

Mitchell F. Hepburn, leader of the Ontario Liberal Party, who is conducting a strenuous campaign in preparation for the forthcoming Provincial General Elections. This is a new picture of Mr. Hepburn.

Radio Expenses

Canadian Radio Commission Spent \$316,934 For Artists

Ottawa.—During the fiscal year 1933-34 the Canadian Radio Broadcasting Commission spent \$316,934 for artists and \$104,143 for equipment of studios and stations and new construction at Ottawa and Montreal. Details of the total expenditure of \$1,128,591 during the year have now been given out.

The commission's statement shows that Hector Charlesworth, the chairman, received \$9,000 per annum salary, and Vice-Chairman Maher and Commissioner W. A. Steel each \$7,200 per annum.

Travelling expenses of the three commissioners were as follows: Mr. Charlesworth, \$1,097; Mr. Maher, \$3,733, and Mr. Steel, \$1,201. Other travelling expenses were \$23,545.

Other items of the commission's expenditures are as follows: Total salaries of office staff, \$54,740; leases of stations, \$38,163; leases of time stations, \$102,836; other salaries, \$67,049; printing and stationery, \$10,997; freight and express, \$2,241; office equipment, \$6,660; telephones and telegraph, \$10,996; publicity, \$1,144; rental of studios, \$14,601; power and light, \$4,170; maintenance, \$11,331; wires, lines, etc., \$302,978; music royalties, etc., \$16,340; station charges for programs, \$20,276.

The total spent by the radio commission is outside \$245,428, spent by the radio branch of the marine department, including \$66,339 for cost of the sale of radio receiving licenses and \$179,000 for the elimination of interference caused by electric power supply lines and domestic electrical devices.

Plane Speeds Up Trip

Northern Territory Covered By Inspector In Record Time

Edmonton.—Following a rapid inspection of northern Manitoba, Saskatchewan and Alberta fur posts, Ralph Parsons, Hudson's Bay fur commissioner, landed at the South Cooking lake air base, a passenger in the Junkers machine piloted by Archie McMullen of Canadian Airways. Mr. Parsons, in less than one week, covered territory that in pre-aeroplane days would have taken months.

In Favor Of League

Ottawa.—Canada will remain a member of the League of Nations, as far as the senate is concerned. With-out a recorded vote, the upper house voted solidly against the motion of Senator A. D. McRae, of Vancouver, to withdraw from Geneva.

Strange Malady Killing Alberta's Wild Fowl

Mystery Death Again Strikes On Stobart Lake Near Calgary

Calgary.—The mystery death that took toll of thousands of wild fowl on Stobart Lake last fall threatens again. The lake is about 60 miles southeast of Calgary. A strange malady, which Dominion and provincial investigators failed to solve last year, has struck again. It was reported, and this year it has spread to gulls, thousands of which have died in the last few days. In September, 1933, and later in the fall, ducks by the thousands died at the lake.

Conditions are reported far worse than last year and authorities in Ottawa and Edmonton have been notified.

FUTURE WELFARE OF EMPIRE RESTS WITH DOMINIONS

Ottawa.—Great Britain's unemployment problem would never be solved until the flow of her surplus population to the Dominions was resumed, Hon. S. M. Bruce, former prime minister of Australia, told a luncheon audience here. Since the Dominions offered the only outlet for that surplus, and they could not take immigrants until a measure of prosperity was restored, it was to the advantage of Great Britain to co-operate toward the restoration of prosperity in the Dominions.

Apart from all question of traditional or sentimental ties, Great Britain was the logical trading associate of the Dominions, Mr. Bruce declared. Great Britain offered the natural industrial complement to the primary producing Dominions such as Australia and Canada.

He was not alarmed at the estimate being made in Great Britain of the agricultural production, Mr. Bruce said, feeling certain such development would never proceed to a point at which it would handicap exports from Empire countries.

The World Economic conference was a "tragic failure," Mr. Bruce said. With a growing belief throughout the world that the necessities and some of the luxuries of life should be made available to every person in the world, the conference had urged restriction of production and the resulting loss to mankind of the benefit of scientific advancement of recent years.

In a "world gone mad with economic nationalism" the 66 countries at the world conference had announced their intention of continuing that policy. Only when there was a return to "sanity" among the nations of the world would there be general prosperity.

In the meantime, Mr. Bruce said, the countries that would best pull through were those possessing the greatest home markets, resources, capital and experience for developing resources. Canada and Australia had all the necessary resources and potentialities of development but lacked population.

"What we must do, as primary producers, is to group with other countries that are industrial and provide a market for us," said Mr. Bruce. Apart altogether from the traditional and sentimental associations naturally pointing in that direction Great Britain remained the best hope for Canada and Australia as the one country most advantageous as a trading associate.

Such an association had to start out with the fundamental principle that all members of the group must prosper. He believed it was quite understood and appreciated in Great Britain that the Dominions were determined to develop also their secondary industries, and he anticipated no great difficulties on that score, Mr. Bruce said.

Neither, said Mr. Bruce, did he apprehend any difficulty arising from Great Britain's agricultural policy. Such development would essentially be limited.

Great Britain was a country relying financially and economically on her exports of industrial products and nothing would be allowed to interfere with that. Also, many countries indebted to Great Britain could only pay by agricultural products.

"If Great Britain is again to solve her unemployment problem and become prosperous again the flow of emigration to the Dominions must be resumed," said Mr. Bruce. It was therefore in the interests of Great Britain that the Dominions become prosperous enough to resume immigration from the Old Country.

BILL DESIGNED FOR PROTECTION OF INVESTORS

Ottawa.—An attack on the whole-sale issue of common stocks of no par value featured review of the Consolidated Companies Act in the House of Commons. Harry Butcher, Liberal member for Last Mountain, Sask., proposed a prohibition against such issues, claiming they led to stock-watering and the fleeing of unsuspecting investors.

Secretary of State Charles H. Cahane said he could not accept the Butcher amendment, which finally was withdrawn. The bill went as far as possible in the direction of protecting investors but all evils could not be wiped out at once. Canada was a small part of the world-wide business structure and it would be futile to try to reform everything at once, especially when provincial legislatures had the right to incorporate companies.

Several clauses of the 298-clause bill passed through committee. In the background of the discussion was the utility of the Dominion "endeavouring to pass blue-sky company legislation, filled with protecting features for investors, when the provinces did not take the same care."

The present bill, said the secretary of state, was one of the most stringent company-incorporation laws in the world and already it had resulted in scores of new companies appealing to the provinces for incorporation.

"I suggest we remedy such evils as we can at the present time," said Mr. Cahane, "and live in reasonable expectation the amendments and reforms incorporated in the bill will be adopted by the several legislatures of Canada, and that we proceed step by step to solve the problem of company organization which confronts us and secure the reforms which the conditions of the commercial and industrial life of his country disclose as being reasonably necessary."

The government had gone as far as it felt it could in refusing the issuance of no par value shares preferred as to capital. In 1924 parliament had changed the act permitting of no par value shares both common and preferred. Hundreds of companies had issued preferred shares of no par value but this would not be permitted in future if this bill became law.

C.P.R. Trust Bonds

New Issue Placed On Market Quickly Disposed Of

Montreal.—The subscription books for the new \$12,000,000 Canadian Pacific Railway year four per cent. collateral trust bonds were closed a few hours after they were opened, the amount being fully applied for.

The bonds, priced at 97.79 and accrued interest to yield about 4.2 per cent. are convertible at holder's option into common shares at the ratio of four shares for each \$100 worth of bonds. They are non-callable and are due July 2, 1949.

The sale was handled by a large syndicate of banks and security companies.

Big Air Race

Many Entries In Race From England To Australia

London.—A famous Australian, Sir Charles Kingsford-Smith and four more Americans were numbered among the 36 flyers who intend to race from England to Australia this summer.

The new American entries are Wiley Post, record-holding round-the-world flyer and his Lockheed plane; John H. Wright, of Ulster, N.Y., who has entered a Lambert monoplane; Keith Rider, flying the monoplane that bears his name, and Murray B. Dilley with a Vance monoplane.

Seeking World Record

California Flyer Will Attempt To Beat Post's Time

Riverside, Calif.—An effort to better Wiley Post's globe-circling record and to win the London-to-Melbourne air derby was announced by Lieut. Murray M. Dilley, reserve army flyer. Lieut. Dilley said he would take off June 30 on a non-stop hop to New York. From there he plans to dash for London, leaving there as an entrant to the Melbourne race.

The projected round-the-world flight will be launched in Melbourne. Post's record is seven days, 15 hours, 58 minutes.

By an unusual coincidence the general elections in Saskatchewan will be held on June 19th, which is the same date as the elections in Ontario. Above we see the three political leaders, left to right: Hon. J. G. Gardiner, leader of the Liberal Party; Premier J. T. M. Anderson, leader of the Conservatives; and M. J. Caldwell, Farmer-Labor Leader.

Many local gardens were nipped by frost last week end.

Dr. Banting and Dr. Saunders were listed for knighthoods conferred by His Majesty's birthday honor list.

An Alberta relief worker drew a lucky one in the Irish sweepstake. And it appears there wasn't a skunk mean enough to inform.

A Russian Jew wanted to become a Canadian citizen. This is how he filled in the questionnaire: Name, Joseph Levinsky; born, yes; business, rotten.

In the list of members of the Hillcrest orchestra taking part in the Lethbridge festival, published last issue, the name of Richard Bennett was inadvertently overlooked.

Barney McLellan, of Bellevue, sixty-five-year-old relief camp worker, drew a rather lucky ticket on the Derby, winning \$2570. He declined to accept a New York offer of \$15,000 for half his ticket.

Frank Wilmott, of Lethbridge, on Monday won the men's championship of the Crows' Nest Pass Golf Association on the Cranbrook course, defeating Frank Hughes, last year's winner.

The Fernie Free Press of last week remarked: Harvey Murphy held an open air meeting on Wednesday evening in Fernie. Harvey was kept very busy explaining how he won the war. Some people actually believed him.

A colony of nudists in Germany are said to live principally on honey. Well, we need scarcely add that they do not keep bees of their own.

Surgeon (to plumber, after operation): "When we had you nicely under the anaesthetic, you tried to come back for something."

Court action will likely be taken by the Amalgamated Mine Workers of Nova Scotia against those responsible for the attempted enforcement of the "closed shop" policy in Pictou County coalfields.

People of the town of High River will vote on the question of whether or not they are to have a vendor store. Only those residing within the town limits will have the privilege of voting.

William Bagley and Ethan McNab, convicts who escaped from the Oakalla prison farm near Vancouver in 1931, have been re-captured and sentenced to death in California. Both were life termers at San Quentin.

E. G. Pescod, K.C., prominent Calgary lawyer, was sentenced to five years in Prince Albert penitentiary, for theft of estate funds to the extent of \$5,600. Pescod is 65 years of age.

Blairmore ball players, had the right hunch last week end when they decided to bring a truck to Bellevue with them, in which they could load their goals. They had seventeen of 'em to bring back. Of course Bellevue retained ten for themselves.

Local and General Items

The Editor will be pleased to receive items for this section, regarding visitors entertained, parties leaving for holidays or short trips, bridge parties, teas, etc. Phone items in to 11 or hand them in at The Enterprise office no later than Wednesday evenings.

J. W. McDonald, K.C., of Macleod, is in town today.

The travelling of Jasper Park highway will commence this month.

P. S. Grisdale, U.F.A. member for Olds, has been appointed Alberta minister of agriculture.

Magistrate J. W. Gresham returned from Calgary on Saturday last, looking considerably improved in health.

Examinations under the Mines Act are being conducted in the Lodge hall here this week, a large number of candidates sitting.

Mrs. Joseph Handley returned to Creston on Saturday night last, after a two weeks visit here with Mr. and Mrs. W. Harrison.

Years ago when a little boy asked his father why pigs were blind, his dad replied: "Hush, hush, my boy! Don't talk about dem tings!"

George wanted to know why the introduction of smaller bank notes, and was told: So you can carry away more of 'em from the bank at one time.

Dr. G. W. Kerby, principal of Mount Royal College, Calgary, was the special speaker at the old-timers' service in the United church at Pincrook last Sunday evening.

A woman who permits a driver of a car to have an arm around her is guilty of contributory negligence and cannot collect damages after an accident, rules a judge.

Audrey Snow is 'sure out of luck. For two years he has been out of work, and finally last week got on at Coal Creek, but only worked three days when he broke a leg—Ferne Free Press.

Great Britain has dispatched a note to the state department of Washington, informing the United States it had been found necessary to defer making any payment on the total of \$261,791,011.68 due on war debts instalment on June 15. Great Britain a year ago made a token payment of ten million, and on December 15 remitted a token of \$8,500,000.

The Coleman Oddfellows came down to Blairmore on Tuesday night last, where they played an interesting game of softball against the local Oddfellows, Blairmore coming out on top with a 22-9 score. After the game, both teams adjourned to the lodge hall, where sandwiches, cake and coffee were partaken of. A return game is arranged for Monday night next.

In reply to an enquiry, we are advised by Inspector Holmes, of the fisheries department, Pincher Station, that Beaver Mines creek will be open for the season 1934. Closed creeks south of Chesholm include Hob or Coal creek, Connelly or Spring creek, Pine creek, Allison or Parrish creek, Star creek, Byron creek, Blairmore or Burns creek, York creek, McGillivray creek, Nes Perce creek, Rock creek, Camp or Cow creek, Burke or Brown creek; also Fish Lake, north of Burnis. Non-residents, as well as residents, must purchase permits at \$2.25.

John J. McGillivray, father of Rev. A. J. McGillivray, P.P., of Macleod, Alberta, died recently at New Glasgow, N.S. He was eighty-six years of age. Besides Father A. J. McGillivray, there survive the following children: Rev. Roderick McGillivray, S.J. of the Immaculate Conception, Montreal; Sister of St. John of St. C.N.D. of Notre Dame convent, Sydney Mines; Sister St. Regina, C.N.D. of Mount St. Bernard's, Antigonish; John A., of Yarmouth; Colin, of Edmonton; Mrs. Frank Webber, of Drumheller; and Mrs. J. P. Hall, of New Glasgow.

Blairmore footballers play at Coal Creek on Sunday evening next.

A Chrysler de-luxe sedan is being delivered this week by the Blairmore Motors to the R.C.M.P.

Well, Dora, the difference between a client and a customer is that the client pays more.

Judging by the number of people who still have axes to grind, these are really dull times.

Teacher: "No, my lad. A joint account is not necessarily the bill your mother has at the butcher shop."

Mrs. Arthur Young, of Macleod, underwent an operation at Galt hospital, Lethbridge, on Saturday, and is reported doing nicely.

A newspaper carries a heading, "Interesting Address on Bees." Well, the last time we sat on a bee, our address was ridiculously interesting.

Two men spent the holiday in New York, and stayed at a big hotel. Coming in late one night, they found that the lift was closed, which meant climbing the stairs to the top story. They therefore arranged to exchange funny stories while mounting, so as to lighten their climb. They were then said: "Here's the best joke of practically at the top when one of all—'I've left the key downstairs.'"

Teacher: "Spell 'straight.'"
Pupil: "S T R A I G H T."
Teacher: "Correct. Now, what does it mean?"
Pupil: "Without ginger ale."

Wife (trying on spring hat): "Do you like this turned down?"
Husband: "How much is it?"
Wife: "Eleven dollars."
Husband: "Yes, turn it down."

Flapper (looking nervously at small boy with dog): "Er, don't let him bite me, he's showing his teeth."
Small Boy: "Oh, you can't go by that, miss; you're showing your legs, but I don't suppose you'll kick."

A lady called at our office on Friday morning, and after bidding us the time of day, remarked: "I'm quite a near neighbor of yours now—living just across the river."
"Indeed," we replied. "Hope you'll drop in some day." She immediately disappeared.

"Most interesting!" said the sweet young thing to the motor car salesman, "and now show me the depreciation, please? I hear it is the heaviest part of the car."
"Well, as a matter of fact, madam, we found it a source of worry, and had it removed altogether."

"Thanks very much," said the new vicar as little Tommy handed up his offering for the harvest festival. "I must call around this afternoon and thank your mother for these eight beautiful apples."

"P-please, sir," stammered Tommy, "w-would you m-mind th-thanking her for twelve apples?"

A Scotsman went to Australia and began boasting about his countrymen. "We run everything in England," he asserted, "the house of commons, all the industries, the city, the law—everything, in fact. I suppose you find it the same here?"

"Oh, yes," replied the Australian, "we have a lot of your countrymen here, but our worst plague is the rabbits."

A ring on the finger is believed to be worth two on the phone.

Everybody readily agrees with the man who doesn't think much of himself.

We have been scanning the pages of Calgary papers, but have not noticed any account of the marriage of Harvey Murphy.

It is anticipated that a thousand or more delegates will attend the Maritime Provinces Grand Lodge sessions of the I.O.O.F. in August at New Glasgow, N.S.

J. Gordon Savage, former manager for Plunkett and Savage at Lethbridge, and brother of Sam S. Savage, of Calgary, died suddenly at Edmonton on Sunday, aged 59.

E. V. Steele, who has represented the Metropolitan Life Co., in this district for the past year, is being transferred to Calgary, and his territory taken over by J. H. Peel, of Calgary. Milo Huffman, the company's southern Alberta manager, is up from Lethbridge effecting the transfer.

Nearly two city blocks in length and forty feet high, the recent walling, kalsomining and painting of the huge rotunda of the Canadian Pacific railway station at Vancouver required 850 pounds of white kalsomine on the ceiling, 725 pounds of cream kalsomine on the walls, and seven gallons of paint on the lower trim.

Once in a while a man's makeup is so arranged that the part he talks with is bigger than the part he thinks with.

The next regular meeting of Crows' Nest Chapter of the I.O.D.E. will be held at Colombo's cabaret on Monday evening next, June 11th, at 7.30.

Protests against the Workmen's Compensation Board are heard from many parts of Alberta, charging incompetence with reference to the administration of the Act and calling on the government to adjust the board and its functioning.
